

CAMAPREN

Acid protect-glove

The Camapren protective gloves made of Polychloroprene, a proven material with good, well-balanced properties in relation to chemical and mechanical resistance. A more durable alternative to natural Latex. The anatomical design reduces operator fatigue. Good flexibility and pronounced surface profile ensure excellent sensitivity and a sure grip. The flocked finish reduces perspiration. Altogether, this is a range of products of excellent comfort and wear characteristics, reliable, economical and popular with users.
