

# STICKY MAT - Adhesive mat

*For cleanroom class ISO 5 - 6*

For reduction of dirt and dust as well as a permanent and effective dustbinding in entrance areas.

**STICKY-MAT** consists of 30 layers of tough and thin Polyethylen film building a mat with only 2 mm thickness.

Each one of the white layers is coated with an adhesive taking off particulates from shoes and transport devices when contacted.

The mat surface provides full surface contact and thus ensures an effective elimination of dirt.

When the upper layer is used up it is simply taken off and a new one appears right below.

The quantity of dust, dirt and particles can be seen and therefore the **STICKY- MAT** is an excellent control instrument for making the degree of dirtiness visible.

**Thickness:**                      appr. 2 mm

**Packaging unit:**                1 mat with each 30 layers  
4 mats in 1 case

<b>Size:</b>	<b>Colour:</b>	<b>Article-no.:</b>
1200 x 600 mm	white	MST1200-W
1140 mm x 660 mm	white	MST1140-W
